Description :

Prsentation de l'diteur'A writer who is a storyteller first and a science fiction writer second. In his ability to absolutely rivet the reader, it seems to me that he is the logical heir to Isaac Asimov and Arthur C. Clarke' Stephen KingThe year is 2255. The Academy that trained the starfarers is long gone and veteran pilot Priscilla 'Hutch' Hutchins spends her retirement supporting fund-raising efforts for The Prometheus Foundation, a privately funded organization devoted to deep space exploration. But when a young physicist unveils an efficient star drive capable of reaching the core of the galaxy, Hutch finds herself back in the

deepest reaches of space, and on the verge of discovering the origins of the deadly Omega clouds that continue to haunt her. Revue de presse Jack McDevitt is that splendid rarity, a writer who is a storyteller first and a science fiction writer second. In his ability to absolutely rivet the reader, it seems to me that he is the logical heir to Isaac Asimov and Arthur C. Clarke (Stephen King) McDevitt offers another riveting vision of humanity's stellar future (Booklist) Nebula Award-winner McDevitt's novels featuring Hutchins display his talent for character building and seamlessly blending hard science with SF action/adventure (Library Journal) Fascinating and highly recommended . . . Cauldron succeeds on many levels: as a compelling character study, as an SF interstellar masterpiece, and as author Jack McDevitt's scathing commentary on the urgent need for space exploration (BookLoons) Presentation de l'auteur 'A writer who is a storyteller first and a science fiction writer second.
