## Description :

Prsentation de l'diteurFor Learning Theory/Cognition and Instruction, Advanced Educational Psychology, and Introductory Educational Psychology courses. An essential resource for understanding the main principles, concepts, and research findings of key learning theories especially as they relate to educationthis proven text blends theory, research, and applications throughout, providing its readers with a coherent and unified perspective on learning in educational settings.Prsentation de l'diteurFor Learning Theory/Cognition and Instruction, Advanced Educational Psychology, and Introductory Educational Psychology courses. An essential resource for understanding the main principles, concepts, and research findings of key learning theories especially as they relate to educationthis proven text blends theory, research, and applications throughout, providing its readers with a coherent and unified perspective on learning in educational settings.Quatrim de couvertureAn essential resource for understanding the main principles, concepts, and research findings of key theories of learningespecially as they relate to educationthis proven text blends

theory, research, and applications throughout, providing readers with a coherent and unified perspective on learning in educational settings. Key features of the text include: Vignettes at the start of each chapter illustrating some of the principles discussed in the chapter, examples and applications throughout the chapters, and separate sections on instructional applications at the end of each chapter. A new chapter on Self-Regulation (Chapter 9). Core chapters on the neuroscience of learning (Chapter 2), constructivism (Chapter 6), cognitive learning processes (Chapter 7), motivation (Chapter 8), and development (Chapter 10) all related to teaching and learning. Updated sections on learning from technology and electronic media and how these advancements effectively promote learning in students (Chapters 7-10). Detailed content-area learning and models of instruction information form coherence and connection between teaching and learning in different content areas, learning principles, and processes (Chapters 2-10). Over 140 new references on the latest theoretical ideas, research findings, and applications in the field.
