Description :

Prsentation de l'diteurAt last a simple guide to long exposure photography using a 10-stop filter. This guide covers many of the aspects of using these filters to create stunning images in the field. This is not a classroom textbook, rather a guide supported with over 40 images to help you make the most of your time out taking photographs.Using a 10-stop filter takes your photography to a new level, opening up a world of creativity where you are limited only by your imagination. There is no time of day unsuitable for 10-stop photography and there are a wealth of subjects that are enhanced with it's use, as this guide will demonstrate. The guide is beautifully illustrated with photographs together with the corresponding camera information to help you achieve similar images of your own.The authors are award winning photographers with some of the images contained in this book being shortlisted for competitions both in the UK and Internationally.If you have seen long exposure photographs and wondered how the photographer achieves the effect, this is the guide for you!Tripods at Dawn Holidays for Photographers are run by photographers and friends, Cath

Evans Mike Stephenson. With their knowledge of photography and the locations, they will guide you to the best locations at the best time to capture great images. Many of the photographers who have been on a Tripods at Dawn holiday have used the techniques within this guide to great effect. Tripods at Dawn Holidays are about getting out there and enjoying photography and stunning scenery with like-minded people. Exploring locations, the camaraderie of photographers waiting for the sun to rise, the rain to stop, the Northern Lights to appear or someone to share a drink with at the end of the day. Tripods at Dawn holidays are just that...holidays. For more information please visit www.tripodsatdawn.com With "Using a 10-stop Neutral Density Filter for Long Exposure Photography" as your guide, your photographic style will evolve and you will begin 'seeing' potential opportunities within the landscape that you may have previously overlooked. We hope you enjoy this guide and that it assists you in your photographic journey. Prsentation de l'diteur At last a simple guide to long exposure photography using a 10-stop filter.
